ABOUT ME

Fourth-year student on the Double Bachelor's Degree in Industrial Electronics Engineering and Electrical Engineering at the University of Seville. I am looking for an internship or a first job as a junior engineer, ideally in robotics. In the eUSRacing MotoStudent team I am in charge of the electric motor dynamometer, combining power electronics, control, instrumentation and project planning. I am driven by turning ideas into working prototypes.

EXPERIENCE

E-Powertrain & Electronics Systems Member

eUSRacing · MotoStudent, University of Seville | **December 2025 – Present**

- In charge of the electric motor **dynamometer**: it measures torque, speed and power to characterise the motor and tune the inverter.
- Control and power electronics: **PID control** on a microcontroller, IGBT PWM stage, load cell, encoder and **CAN bus** telemetry. PCBs in **KiCad**.
- Project planning with **PERT-CPM** and design of the electrical safety system.

Digital Management & Online Customer Service Lead

Alojamientos Mares de Lava | **May 2022 – December 2024**

- Built the company website, which significantly increased bookings.
- Automated processes and managed the properties across booking platforms.

Grape Harvest & Reception Platform Worker

El Grifo Winery · Lanzarote | **July – August 2026**

EDUCATION

2023 – 2028 — Double Bachelor's Degree in Industrial Electronics Engineering and Electrical Engineering
University of Seville · 4th year

2023 — Spanish Baccalaureate in Science and Technology
IES Las Salinas

ADDITIONAL TRAINING

2024 — Drone Pilot Certificate (A1/A2/A3)
Spanish Aviation Safety Agency (AESA)

2026 — AI for Brainstorming and Planning
Google · Coursera

OCTAVIO MARTÍN HERNÁNDEZ

Industrial Electronics & Electrical Engineering

SKILLS

PROGRAMMING

C/C++ · Python · MATLAB/Simulink · Arduino · ESP32

DESIGN

KiCad · AutoCAD · SolidWorks

SIMULATION

PSpice/OrCAD · LTspice · Multisim · PSIM

LABORATORY

Electronic instrumentation · Soldering · Circuit assembly and testing

OTHER

PERT-CPM · Microsoft Office · AI tools

PROJECTS

MotoStudent Rulebook AI Assistant

eUSRacing | 2026

AI web app that answers questions about the competition rulebook, citing the exact clause. Prototype deployed and proposed to the team.

BeeTec

Product design | 2026

Modular system of connectable hexagonal pieces: speaker, LED light, power module and wireless charger.

Vital signs monitoring pill

ESP32 prototype

Device that measures patients' vital signs, assesses critical events and raises alerts.

Cold chain temperature label

imaginPlanet Challenge · Team | Oct 2026 – Present

Prototype in development: a sustainable label with an irreversible thermosensitive barcode that changes when a medicine or food exceeds its temperature limit, revealing it when scanned.

LEADERSHIP & INNOVATION

Sputnik Programme Scholar

7th edition · Sponsored by Appian | Sep – Dec 2026

Training in leadership, exponential technologies and start-up creation.

Telefónica Digital University Leaders 2026

Telefónica University Chairs Network | October 2026

Developed **ColaJusta**, an AI tool that prioritises urban maintenance reports by social impact, cost and urgency, with a working web prototype.
